

Hello, I disagree completely with broadcasters campaigning against XM's  
Why? By the simple reason of they provide me a great variety of channels, the  
quality of the service is excellent, and the service is total free of  
advertising, and if I decide to pay for that, is my right and nobody else should  
change that for being afraid instead offers to customers better service.

So that, please vote for our right to listen what we want. Please be a favor of  
XM's Satellite Radio.

Sincerely...

Luis Felipe Corral.
